

A CRM Application To Manage The Services Offered By An Institution

BY

Vellaturi Raghavendra

EduConsultPro Institute, a leading educational organization offering a diverse range of courses and programs, is experiencing a surge in the number of prospective students seeking admission. This growth has exposed several challenges in managing the admission process, addressing student inquiries, and delivering consulting services effectively. The existing manual processes are inefficient, error-prone, and result in delays, creating dissatisfaction among both students and staff. To overcome these issues and optimize operations, EduConsultPro Institute has decided to adopt Salesforce CRM. This project will focus on automating the admission application process, establishing an approval workflow for consulting requests, managing consulting services and appointments, and tracking immigration cases. By harnessing the powerful features of Salesforce CRM, the institute aims to enhance the experience of prospective students while improving operational efficiency for its admissions team.

1. Requirements

- **Admission Application Management**

Prospective students can complete and submit admission application forms through the institute's website or portal. These forms will collect comprehensive details, including personal information, academic history, and qualifications. Upon submission, the applications will be securely stored in Salesforce CRM, and students will receive automated email notifications confirming their submission. Admissions staff can utilize Salesforce's reporting and dashboard features to analyze key metrics, such as application volumes, acceptance rates, and enrollment trends.

- **Approval Workflow for Consulting Requests**

Salesforce will facilitate an approval workflow for reviewing and processing consulting requests. Automated email alerts will notify students of the approval or rejection of their requests. Each consulting request will be submitted to the system automatically upon creation to ensure seamless tracking and processing.

- **Consulting Services Management**

Prospective students can request consulting services directly via the institute's website or portal. The consulting request form will gather key details, including student information, consulting preferences, and required areas of expertise. Submitted requests will be logged in Salesforce CRM, triggering automated email notifications to consultants and advisors. Consultants can view, accept, and manage requests within the Salesforce interface. Appointment scheduling, including specifying the date, time, and purpose, will be streamlined through Salesforce. Additionally, the status of appointments (e.g., scheduled, completed, or canceled) will be monitored and updated in real time.

- **Immigration Case Management**

Students will have multiple options to initiate immigration cases, including phone, email, or web submissions. An immigration case submission form will capture all relevant details and required information. Once submitted, cases will be logged in Salesforce CRM, and automated email notifications will alert immigration agents and case managers of new cases. Agents can view, process, and monitor cases directly within Salesforce. The system will track case statuses (e.g., open, in progress, or closed) and include integrated tools for document management and collaboration to enhance efficiency and accuracy.

2. Creating Objects from Spreadsheets

In Salesforce, objects function as database tables designed to store data relevant to your organization. Each object consists of records (which are similar to rows) and fields (which are akin to columns), providing an organized structure for your data. These objects are essential for managing and interlinking different types of information, facilitating efficient data tracking, reporting, and analysis within the Salesforce environment.

To create objects from spreadsheets in Salesforce, follow these steps:

- 1. Prepare Your Spreadsheet:** Ensure your spreadsheet data is clean and well-organized. Each column should correspond to a field in Salesforce, and each row should represent a record.
- 2. Save the Spreadsheet:** Save your spreadsheet in a compatible format, typically CSV (Comma Separated Values).
- 3. Log in to Salesforce:** Access Salesforce and navigate to the setup menu.
- 4. Use the Data Import Wizard:** In the setup menu, find the Data Import Wizard. Select the standard or custom object you want to create records for.
- 5. Upload Your Spreadsheet:** Follow the wizard to upload your CSV file. Map the spreadsheet columns to Salesforce fields.
- 6. Start the Import:** Review the mappings, and start the import process. Salesforce will create records based on your spreadsheet data, allowing you to manage and analyze it within the platform.

Course Object:**Course Object**

The Course object is a critical component of the CRM application, designed to manage the educational services offered by the institution. It captures essential details about each course, such as its description, duration, and associated instructors. By creating a centralized and organized repository of course information, the institution can efficiently monitor, manage, and evaluate its offerings. This enhances the ability to provide personalized experiences to students and streamlines administrative workflows.

Consultant Object

The Consultant object plays a vital role in the CRM application, enabling the management of institutional services. It stores detailed information about each consultant, including their areas of expertise, availability, and the courses they are assigned to.

Student Object

The Student object is a key element of the CRM application, designed to manage the institution's services. It maintains comprehensive student records, including enrollment details, contact information, and course registrations. By organizing student data in a structured manner, the institution can track progress and deliver tailored communication to meet individual needs.

Appointment Object

The Appointment object is an integral part of the CRM application, facilitating efficient management of institutional services. It stores detailed information about appointments, such as dates, times, participants, and purposes. Centralizing appointment data helps streamline scheduling, ensures timely follow-ups, and optimizes resource allocation, ultimately enhancing service delivery.

Creating a Screen Flow for the Student Admission Application Process

The Screen Flow for the Student Admission Application Process is a robust feature designed to automate and optimize the admission process. It facilitates efficient data collection, course selection, and record creation, minimizing manual errors and saving time. Additionally, the flow enhances the applicant experience by providing instant feedback and communication while enabling the institution to better manage student data, monitor admissions, and deliver personalized educational services.

Steps to Create the Screen Flow

- 1. Start the Flow**
 - Begin by creating a new Screen Flow in Salesforce Flow Builder.
- 2. Student Info Screen**
 - Add a "Screen" element and name it "Student Info."
 - Include fields to collect:
 - Text fields: Name, Email, Phone Number
 - Picklist: Gender
 - Date field: Date of Birth
 - Mark required fields and save.
- 3. Create Student Record**
 - Add a "Create Records" element and name it "Create Student Record."
 - Configure it to create a single record in the Student object.
 - Map input fields to corresponding Student object fields.
- 4. Course Screen**
 - Add another "Screen" element and name it "Course Screen."
 - Add a picklist field for course selection with options such as IELTS, GRE, GMAT, Duolingo, and TOEFL.
- 5. Selecting Course Decision**
 - Add a "Decision" element named "Selecting Course."
 - Define decision outcomes based on the selected course (e.g., Selected IELTS, Selected GRE, etc.).
- 6. Course-Specific Records**
 - For each course, create the following:
 - A "Get Records" element to fetch relevant course records.
 - A "Create Records" element to log the registration in the respective course object.
 - Repeat for IELTS, GRE, GMAT, Duolingo, and TOEFL.
- 7. Send Confirmation Email**
 - Add an "Action" element named "Send Email to Student."
 - Configure the email template, recipient (using the collected email), and additional details.
- 8. Success Screen**
 - Add a final "Screen" element named "Success Screen."
 - Include a display text component confirming successful registration.

Connecting the Elements

- Connect the flow elements as follows:
 - Start → Student Info → Create Student Record → Course Screen → Selecting Course.
 - Branch from the "Selecting Course" decision to each course-specific path (IELTS, GRE, GMAT, Duolingo, TOEFL).

- Each course path connects to the "Send Email to Student" action.
- The "Send Email to Student" action connects to the "Success Screen."

This flow ensures a streamlined and user-friendly admission process while providing the institution with efficient data management and operational control.

Profile: Select the profile that matches the user's job functions and permissions, like "Standard Platform User" or "System Administrator."

- c. Additional settings include options like Marketing User, Offline User, Knowledge User, etc., which can be checked based on the user's needs.

3. Set User Preferences

- a. Configure user-specific settings such as:

Email Encoding: Choose the appropriate email encoding format.

Locale, Time Zone, and Language: Set these according to the user's location.

Accessibility Mode: Enable this if the user requires enhanced accessibility.

4. Save the User

- a. Once all the necessary information and preferences are entered, click "Save" or "Save & New" to create the user and immediately proceed to create another one.

Configuring User Settings:

1. Edit User Details

To modify an existing user's details.

Update the necessary fields and settings as described above.

2. Assign Permission Set

Permission sets grant additional permissions beyond those defined by the user. Navigate to "Permission Sets" in the Setup menu.

Assign the relevant permission sets to the user.

3. Profile and Role Adjustments

Profiles control what users can see and do in Salesforce.

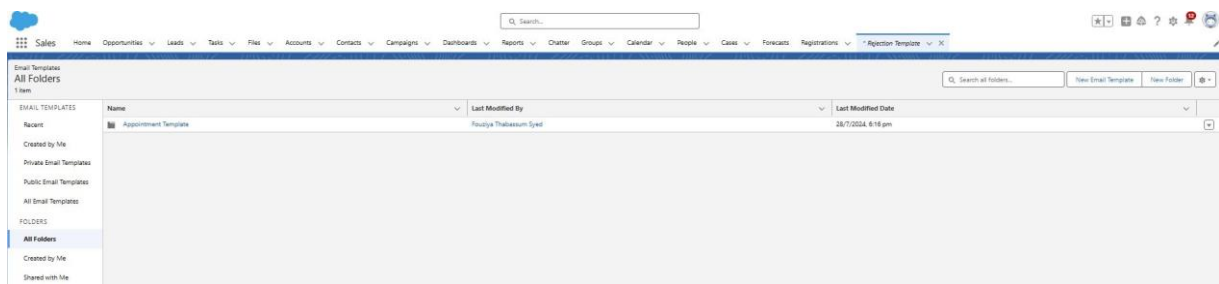

Roles control the level of access users have to data based on the organization. Adjust these settings as needed to ensure users have the appropriate access.

5. Approval Process for Appointment Object

In this project, we have implemented a structured approach to creating and managing email templates in Salesforce. First, we enabled Lightning Email Templates by navigating to Setup, using the Quick Find box to locate "Templates," and toggling on the Lightning Email Templates option.

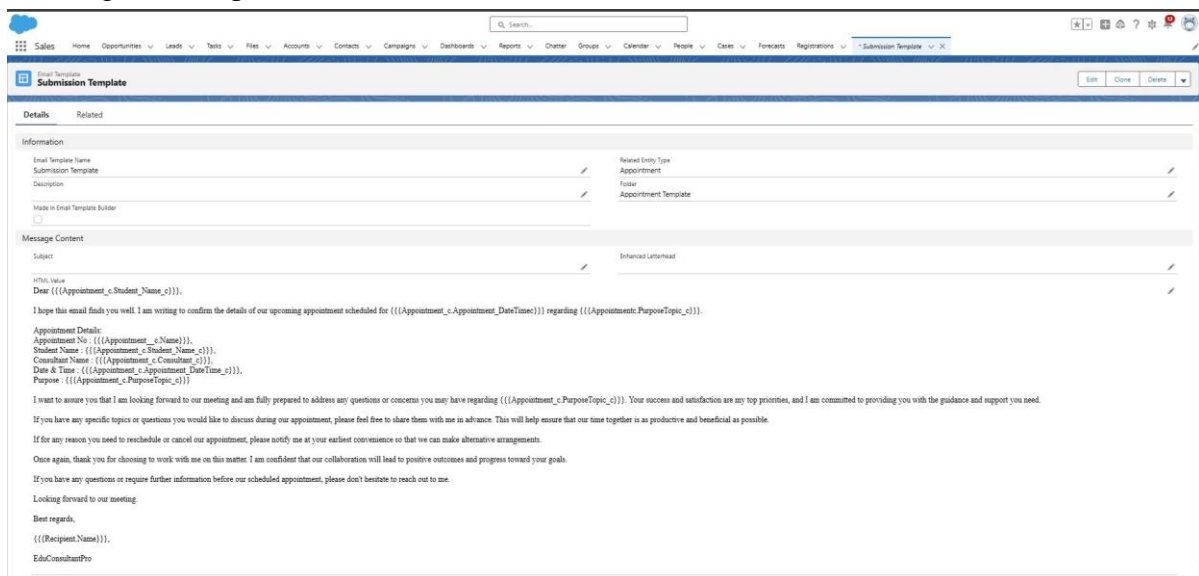

Creating the Appointment TemplateFolder

we created a dedicated folder named "Appointment Template" in the Email Templates section accessed via the App Launcher. Its role in centralizing and managing these templates ensures that our appointment scheduling process is streamlined and professional, ultimately contributing to the overall success of our project.

Creating the Submission Template

we created a dedicated folder named "Appointment Template" in the Email Templates section accessed via the App Launcher. Within this Appointment Template folder, we developed a new email template titled "Submission Template," ensuring to input relevant details such as the template name, description, and subject. The HTML content for this template was meticulously crafted to provide a clear and professional confirmation message for recipients.

Creating the Approval Template

The Approval Template is a crucial component of our project, facilitating clear and efficient communication regarding appointment approvals. The Approval Template is a vital tool for maintaining clear, professional, and effective communication with students regarding appointment approvals. It enhances the overall efficiency of our appointment scheduling process and contributes to the success of our project by ensuring that all parties are well-informed and prepared for their meetings.

The screenshot shows the 'Approval Template' form in a CRM system. The form is divided into two tabs: 'Details' and 'Related'. The 'Details' tab is active, showing the 'Information' and 'Message Content' sections. The 'Information' section includes fields for 'Email Template Name' (Approval Template), 'Description', 'Related Entity Type' (Appointment Template), and 'Folder' (Appointment Template). The 'Message Content' section includes a 'Subject' (Approval Request) and a 'Body' (Enhanced Lintemail). The body text is a placeholder for an email template, starting with 'Dear {{{Appointment_c_Student_Name_c}}}, I hope this email finds you well. I am pleased to inform you that your request for an appointment scheduled for {{{Appointment_c_Appointment_DateTime_c}}} regarding {{{Appointment_c_PurposeTopic_c}}} has been approved. Appointment Details: Appointment No: {{{Appointment_c_Name_c}}}, Student Name: {{{Appointment_c_Student_Name_c}}}, Consultant Name: {{{Appointment_c_Consultant_c}}}, Date & Time: {{{Appointment_c_Appointment_DateTime_c}}}, Purpose: {{{Appointment_c_PurposeTopic_c}}}. I want to assure you that I am looking forward to our meeting and am fully prepared to address any questions or concerns you may have regarding {{{Appointment_c_PurposeTopic_c}}}. Your success and satisfaction are my top priorities, and I am committed to providing you with the guidance and support you need. If you have any specific topics or questions you would like to discuss during our appointment, please feel free to share them with me in advance. This will help ensure that our time together is as productive and beneficial as possible. If for any reason you need to reschedule or cancel our appointment, please notify me at your earliest convenience so that we can make alternative arrangements. Once again, thank you for choosing to work with me on this matter. I am confident that our collaboration will lead to positive outcomes and progress toward your goals. If you have any questions or require further information before our scheduled appointment, please don't hesitate to reach out to me. Looking forward to our meeting. Best regards, {{{Recipient_Name_c}}}, EduConsultPro'.

Creating the Rejection Template

The Rejection Template is an essential component of our project, designed to handle situations where appointment requests cannot be approved. The Rejection Template is a crucial tool for managing situations where appointment requests cannot be approved. It ensures clear, professional, and compassionate communication with students, encourages proactive problem-solving, and maintains positive relationships by demonstrating support and understanding.

The screenshot shows the 'Rejection Template' form in a CRM system. The form is divided into two tabs: 'Details' and 'Related'. The 'Details' tab is active, showing the 'Information' and 'Message Content' sections. The 'Information' section includes fields for 'Email Template Name' (Rejection Template), 'Description', 'Related Entity Type' (Appointment), and 'Folder' (Appointment Template). The 'Message Content' section includes a 'Subject' (Request Rejection) and a 'Body' (Enhanced Lintemail). The body text is a placeholder for an email template, starting with 'Dear {{{Appointment_c_Student_Name_c}}}, I hope this email finds you well. I am pleased to inform you that your request for an appointment scheduled for {{{Appointment_c_Appointment_DateTime_c}}} regarding {{{Appointment_c_PurposeTopic_c}}} has been approved. Appointment Details: Appointment No: {{{Appointment_c_Name_c}}}, Student Name: {{{Appointment_c_Student_Name_c}}}, Consultant Name: {{{Appointment_c_Consultant_c}}}, Date & Time: {{{Appointment_c_Appointment_DateTime_c}}}, Purpose: {{{Appointment_c_PurposeTopic_c}}}. I want to assure you that I am looking forward to our meeting and am fully prepared to address any questions or concerns you may have regarding {{{Appointment_c_PurposeTopic_c}}}. Your success and satisfaction are my top priorities, and I am committed to providing you with the guidance and support you need. If you have any specific topics or questions you would like to discuss during our appointment, please feel free to share them with me in advance. This will help ensure that our time together is as productive and beneficial as possible. If for any reason you need to reschedule or cancel our appointment, please notify me at your earliest convenience so that we can make alternative arrangements. Once again, thank you for choosing to work with me on this matter. I am confident that our collaboration will lead to positive outcomes and progress toward your goals. If you have any questions or require further information before our scheduled appointment, please don't hesitate to reach out to me. Looking forward to our meeting. Best regards, {{{Recipient_Name_c}}}, EduConsultPro'.

Creating an Approval Process:

The "Appointment Approval" process was implemented to ensure a streamlined and secure workflow for managing appointment requests. This approval process enforces strict control over appointment data, allowing only designated managers to approve or reject submissions. By locking records upon submission, it prevents unauthorized changes and ensures data integrity throughout the approval cycle. Automated email alerts are integrated to keep all relevant parties informed at each stage, enhancing communication and efficiency. This structured approach ensures that appointments are reviewed and approved in a consistent manner, aligning with organizational policies and maintaining high standards of data accuracy and accountability. The implementation of this process ultimately leads to improved operational efficiency and better resource management.

The screenshot displays the 'Appointment Approval' process configuration within a system setup tool. The interface includes a sidebar with navigation options like 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'Approval Processes' and shows the 'Appointment Approval' process details. Key sections include:

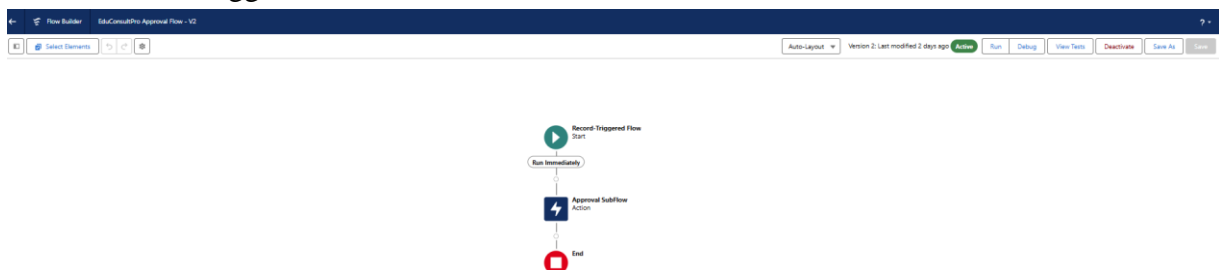

- Process Definition Detail:** Fields for Process Name (Appointment Approval), Unique Name (Appointment_Approval), Description, and Record Locking (Administrator OR Current Approver).
- Initial Submission Actions:** A table with columns for Action, Type, and Description. Actions include Record Lock, Submit, and Email Alert.
- Approval Steps:** A table with columns for Step Number, Name, Description, Criteria, Assigned Approver, and Reject Behavior. Step 1 is defined.
- Final Approval Actions:** A table with columns for Action, Type, and Description. Actions include Record Lock, Final Approval Lock, and Final Approval Email Alert.
- Final Rejection Actions:** A table with columns for Action, Type, and Description. Actions include Record Lock, Final Rejection Lock, and Final Rejection Email Alert.
- Recall Actions:** A table with columns for Action, Type, and Description. Action includes Record Lock.

6. Creating a Record triggered flow

The "EduConsultPro Approval Flow - V2" is a Record-Triggered Flow designed to automate the approval process for appointment requests within the EduConsultPro system. This flow is triggered immediately upon the creation or update of a record, ensuring that the approval process begins without delay.

Flow Structure:

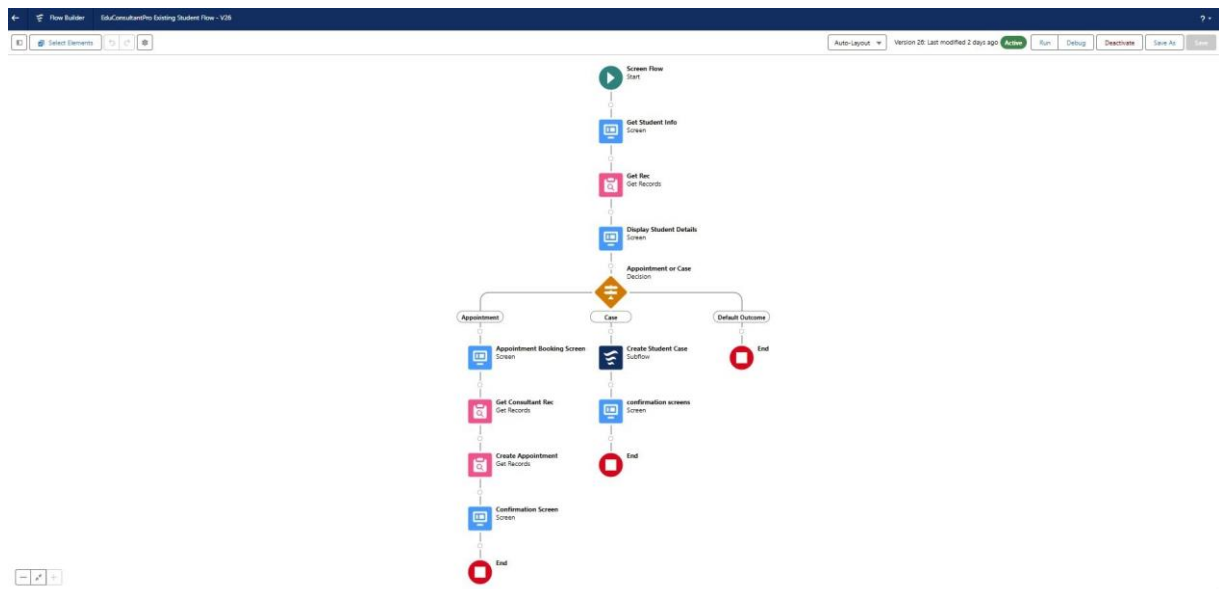

1. **Record-Triggered Flow (Start):** This element initiates the flow as soon as a specified record event occurs, such as the creation or update of an appointment request. The immediate execution ensures that the approval process is triggered in real-time, maintaining the efficiency and responsiveness of the system.
2. **Approval SubFlow (Action):** This component of the flow invokes a subflow dedicated to handling the approval logic. The subflow encapsulates the necessary actions and decisions required to process the approval, ensuring modularity and reusability of the approval logic. By separating the approval logic into a subflow, it becomes easier to maintain and update without impacting the overall flow structure.
3. **End:** The flow concludes after executing the necessary actions within the approval subflow. This signifies the completion of the automated approval process for the triggered record.

The "EduConsultPro Approval Flow" is a critical component in automating and optimizing the appointment approval process within the EduConsultPro system. Its implementation ensures efficient, consistent, and real-time processing of appointment requests, ultimately contributing to improved operational performance and resource management.

7. ScreenFlow for ExistingStudent to Book an Appointment

This ScreenFlow facilitates the process for existing students to book appointments or create cases within an educational consultancy system. The flow initiates by retrieving and displaying student information, then directs the student based on their choice of booking an appointment or creating a case.

Screen Flow Start: This marks the beginning of the flow.

Get Student Info Screen: The flow presents a screen to gather necessary information from the student, such as student ID or other identifying details.

Get Records: The flow retrieves the student's records from the database using the information provided in the previous step.

Display Student Details Screen: The retrieved student details are displayed to the student for verification purposes.

Appointment or Case Decision: The flow presents a decision point where the student can choose to either book an appointment or create a case.

Appointment Path:

Appointment Booking Screen: If the student opts to book an appointment, they are directed to a screen to select the appointment details such as date, time, and purpose.

Get Consultant Records: The flow retrieves records of available consultants for the student to choose from.

Create Appointment Records: the flow creates an appointment record in the database.

Confirmation Screen: The flow displays a confirmation screen confirming that the appointment has been successfully booked.

End : This step marks the end of the flow for the appointment booking path.

Case Path:

Create Student Case Subflow: If the student opts to create a case, a subflow is initiated to handle the case creation process, which may include collecting additional information and documenting the case.

Confirmation Screen: The flow displays a confirmation screen confirming that the case has been successfully created.

End : This step marks the end of the flow for the case creation path.

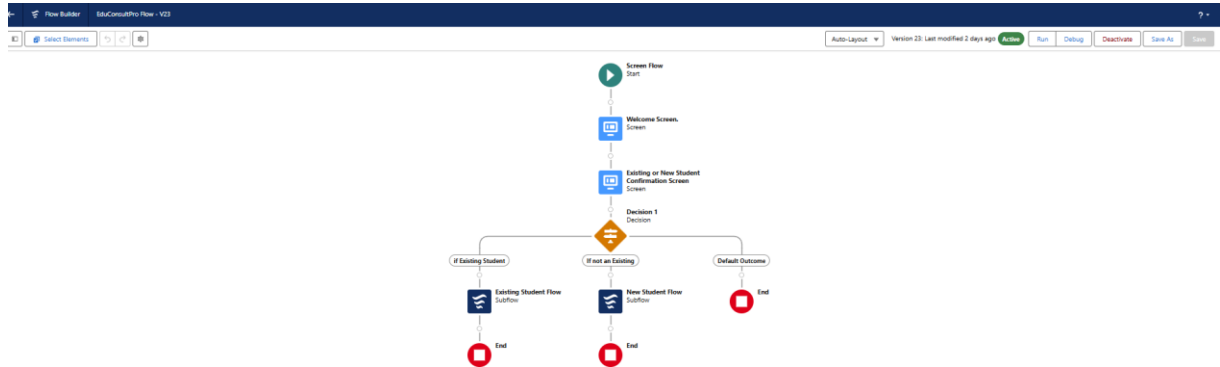

Default Outcome Path:

End : If neither an appointment nor a case is chosen, the flow reaches the default outcome, effectively ending the flow.

Implementing this flow improves the overall management of student appointments and cases, ensuring a seamless and efficient process for both students and the educational consultancy.

8. Combining All Flows into a Single Flow

This combined ScreenFlow integrates the processes for managing both existing and new students within an educational consultancy system. It starts by welcoming the user and then directs them based on whether they are an existing student or a new student. This approach ensures a seamless and unified experience for all students.

Steps to Create the Combined Flow:

Screen Flow Start : This marks the beginning of the combined flow.

Welcome Screen : A welcome screen is presented to the user, providing an introduction and necessary information.

Existing or New Student Confirmation Screen : The flow presents a screen where the user can confirm whether they are an existing student or a new student.

Decision Point (Decision 1) : A decision point is introduced to direct the user based on their selection from the previous step.

- ➡ **If Existing Student:** The user is directed to the Existing Student Flow subflow.
- ➡ **If Not an Existing Student:** The user is directed to the New Student Flow subflow.
- ➡ **Default Outcome :** If no selection is made, the flow reaches the default outcome.

Existing Student Flow Subflow: This subflow handles the process for existing students, guiding them through necessary steps such as booking an appointment or creating a case.

New Student Flow Subflow : This subflow handles the process for new students, guiding them through necessary steps such as registration and initial consultations.

End : Each subflow and the main flow conclude with an end step, marking the completion of the process.

9. Creating a Lightning App Page

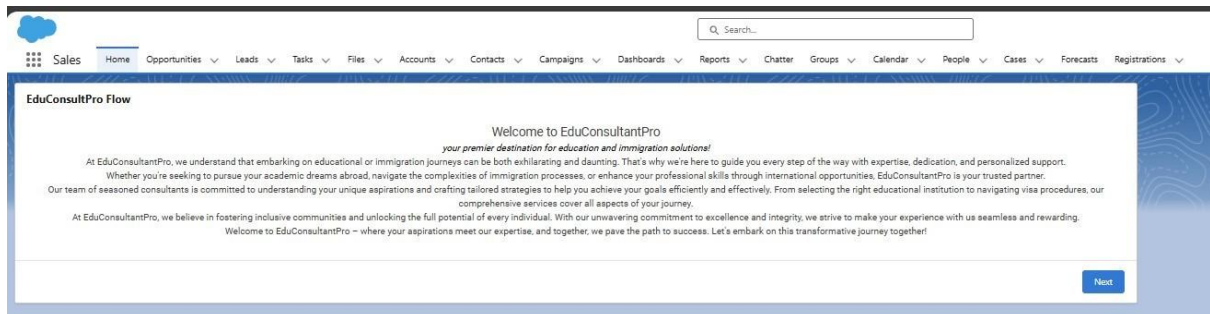

To create a customized home page in Salesforce for your project, start by navigating to the Lightning App Builder through Setup. Enter "App Builder" in the Quick Find box, and click on "Lightning App Builder." Begin the process by clicking "New" and selecting "Home Page," then proceed by naming the page "EduConsultPro Home Page." Choose the Standard Home Page template and finalize this step by clicking "Done."

Next, drag the Flow component into the top-right region of the page. Search for the specific flow named "EduConsultantPro Flow" and save your changes. To make this page functional and accessible, click "Activate," and assign it to the appropriate apps and profiles. Choose the Sales app, then assign it to the "System Administrator" profile. After reviewing your selections, click "Save" to complete the setup.

This process is essential for your project as it customizes the user interface, integrates key components like the "EduConsultantPro Flow," and ensures that the relevant stakeholders, such as system administrators, have streamlined access to vital functionalities within the CRM. This setup enhances the overall efficiency and user experience of the EduConsultPro application.

Output:

EduConsultPro CRM - WelcomePage :

The screenshot displays the initial page of your CRM application, specifically designed to manage the services offered by an institution. The page, titled "EduConsultPro Flow," serves as a welcoming interface for users accessing the system. The central portion of the page is dedicated to an introduction under the heading "Welcome to EduConsultPro," highlighting the application's purpose. It outlines the key services provided by EduConsultPro, emphasizing its role in guiding users through educational and immigration processes with expertise and personalized support. At the bottom right, a "Next" button is visible, likely designed to guide users through subsequent steps or

processes within the application.

EduConsultPro CRM - StudentStatus Confirmation:

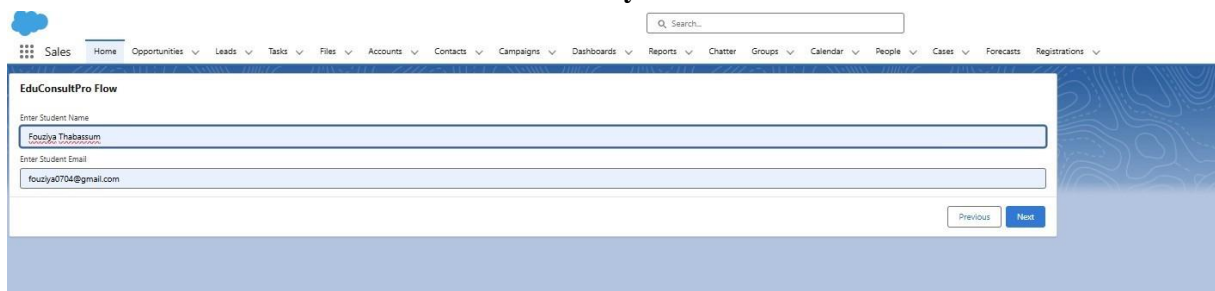

The second page of your CRM application, as shown in the screenshot, continues within the "EduConsultPro Flow" and presents the user with a simple but essential question: "Are you an Existing Student?" This step is likely part of a process to customize the user experience based on their status.

Two radio button options are provided:

- **Yes:** The user selects this if they are already enrolled or registered within the institution.
- **No:** The user selects this if they are a new or prospective student.

There are navigation buttons, "Previous" and "Next," allowing the user to either go back to the previous step or proceed to the next stage of the process. This page helps in identifying the user's current relationship with the institution, which is crucial for guiding them through the appropriate workflow, whether that involves updating existing records or creating new ones.

EduConsultPro CRM - StudentInformation Entry:

This page appears after the user has selected "Yes" to indicate that they are an existing student.

Enter Student Name: The user is required to input their full name.

Enter Student Email: The user must provide their email address.

These inputs are crucial for identifying the student in the system, allowing the application to retrieve or update the corresponding records accurately. Once the details are entered, the user can navigate forward by clicking the "Next" button or go back to the previous

screen using the "Previous" button.

Service Selection: The user is prompted with the question, "How may I help you?" followed by two options:

Book an Appointment: Likely directs the user to schedule a meeting or consultation.

Immigration Case: Possibly leads to initiating or managing an immigration-related service

Appointment Booking Selection for Existing Student

The screenshot shows the 'EduConsultPro Flow' interface. At the top, there's a navigation bar with various menu items like Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, Groups, Calendar, People, Cases, Forecasts, and Registrations. Below the navigation bar, the main content area is titled 'EduConsultPro Flow'. It contains a question 'How may I help you?' with two radio button options: 'Book an Appointment' (which is selected) and 'Immigration Case'. At the bottom right of the main content area, there are two buttons: 'Previous' and 'Next'.

In this EduConsultPro Flow screen, an existing student is presented with two service options: "Book an Appointment" or "Immigration Case." The question "How may I help you?" guides the student to select the service they need. In this scenario, the student has chosen the "Book an Appointment" option, indicating their desire to schedule a consultation or meeting, likely with a consultant or advisor. The student can then click "Next" to proceed with the appointment booking process or "Previous" to return to an earlier step. This screen is essential for directing the student to the appropriate service, ensuring that their specific needs are met efficiently.

EduConsultPro Flow - Service Selection:

The screenshot shows the 'EduConsultPro Flow' interface with a form for appointment booking. The form includes the following fields: 'Appointment Date/Time' with sub-fields for 'Date' (12/06/2024) and 'Time' (12:00 pm); 'Purpose/Topic' with a text input field containing '#'; 'Notes' with a text input field containing 'Is important'; 'Appointment' with a dropdown menu showing 'Consultant'; 'Consultant' with a dropdown menu showing 'Home'; 'Student' with a dropdown menu showing 'Iqbal Nayika Thakuram'; and 'Status' with a dropdown menu showing 'Approved'. At the bottom right of the form, there are two buttons: 'Previous' and 'Next'.

In this screenshot from a CRM application, you are in the "EduConsultPro Flow," which appears to be a custom workflow or wizard designed to guide users through a series of steps to manage services offered by an institution. The interface is part of a Salesforce CRM, as indicated by the Salesforce branding and navigation bar at the top.

NewConsultant Creation in EduConsultPro Flow:

EduConsultPro Flow

Appointment Booking Confirmation for Existing User:

EduConsultPro Flow

Dear a05Qy0000098XhZIAU,

Congratulations and welcome to EduConsultPro!

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.

Your Registration details have been sent through mail kindly check it once.

Thank you.

Previous

Finish

This final screen in the EduConsultPro Flow confirms the successful completion of the appointment booking process for an existing user. It displays a congratulatory message, welcoming the student to EduConsultPro and informing them that their registration on the platform has been successfully completed. The screen also mentions that the student's registration details have been sent via email, and they are encouraged to check their inbox. The user can either click "Previous" to review earlier steps or "Finish" to complete the process, marking the end of the appointment booking flow.

Immigration Case Selection for Existing Student:

EduConsultPro Flow

How may I help you?

☐ Book an Appointment

☒ Immigration Case

Previous

Next

This screen is part of the EduConsultPro Flow and presents an option for an existing student to initiate or manage an immigration case. The user is asked, "How may I help you?" and can choose between "Book an Appointment" or "Immigration Case." In this scenario, the "Immigration Case" option is selected, which suggests that the student is interested in handling issues related to immigration, such as visa applications, renewals, or other related services.

Confirming Customer Information:

The screenshot shows a Salesforce flow screen titled "EduConsultPro Flow" with the subtitle "Confirm Customer Info". A message bubble from a representative named GANESH says, "Hello, this is HARSHA VARDHAN. Can you please provide your first and last name?". Below the message are two input fields: "First Name" with the value "HARSHAVARDHAN" and "Last Name" with the value "MASHETTI". At the bottom right are "Previous" and "Next" buttons.

The image shows the "Confirm Customer Info" screen in a Salesforce flow, part of an immigration case management process. In this step, the customer is asked to confirm their first and last name. The user is greeted by a representative, "GANESH," and prompted to enter their first name (GANESH) and last name (T). Once the information is provided, the user can proceed by clicking the "Next" button at the bottom right corner of the screen.

Confirming Customer Contact Details:

The screenshot shows a Salesforce flow screen titled "EduConsultPro Flow" with the subtitle "Confirm Customer Details". A message bubble from the representative says, "Thanks, HARSHAVARDHAN! Next, can you please provide your email address and phone number?". Below the message are two input fields: "Email Address" with the value "harshavardhanmashetti@gmail.com" and "Phone Number" with the value "06302298013". At the bottom right are "Previous" and "Next" buttons.

The image depicts the next step in the immigration case management process within the Salesforce flow, labeled "Confirm Customer Details." In this step, after confirming their name, the customer is now asked to provide their contact information, specifically their email address and phone number. The email address field is filled in with 21bq1a5451vvit.com and the phone number field is completed with "8888888888". The user can continue to the next step by clicking the "Next" button at the bottom right corner of the screen.

Gathering Case Details for Support:

The screenshot displays the 'Get Case Details' screen within the 'EduConsultPro Flow'. At the top, there is a search bar and a navigation menu with options like Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, Groups, Calendar, People, Cases, Forecasts, and Registrations. The main content area contains a form with the following fields:

- * Case Type: Mechanical
- * Case Origin: Email
- * Case Subject: Artificial intelligence
- * Case Details: Advanced

At the bottom right, there are 'Previous' and 'Next' buttons.

This image shows the "Get Case Details" screen in the Salesforce flow, where the customer is asked to provide specific details about their case. This step is crucial for accurately addressing the customer's needs.

The customer is prompted to fill out the following fields:

1. **Case Type:** Selected as "Mechanical."
2. **Case Origin:** Set to "Email."
3. **Case Subject:** Entered as "Artificial intelligence."
4. **Case Details:** The customer has provided the text "Advanced" to describe the specifics of their inquiry.

Once these details are filled in, the user can proceed by clicking the "Next" button at the bottom right corner of the screen.

Immigration Case Status Update

The screenshot displays the 'Immigration Case Status Update' screen within the 'EduConsultPro Flow'. At the top, there is a search bar and a navigation menu with options like Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, Groups, Calendar, People, Cases, Forecasts, and Registrations. The main content area contains a message from the EduConsultPro team:

Dear Student,
We are pleased to update you on the status of your immigration case with EduConsultPro.
Your case has been successfully processed. We are committed to providing you with timely updates and support throughout this process.
Please check your email for detailed information about your case and next steps. Should you have any questions or need further assistance, do not hesitate to reach out to us.
Thank you for entrusting us with your immigration journey. We are here to support you every step of the way.
Best regards,
The EduConsultPro Team

At the bottom right, there are 'Previous' and 'Finish' buttons.

The communication ends with a thank you note from the EduConsultPro team, emphasizing their commitment to supporting the student throughout their immigration journey.

Non-Existing Student Selection:

The screenshot shows the top of a Salesforce page. At the top left is the Salesforce logo and a navigation bar with tabs: Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, Groups, Calendar, People, Cases, Forecasts, and Registrations. A search bar is located at the top right. Below the navigation bar, the page title is 'EduConsultPro Flow'. The main content area contains a question: 'Are you a Existing Student'. There are two radio buttons: 'Yes' and 'No'. The 'No' radio button is selected. At the bottom right of the form, there are two buttons: 'Previous' and 'Next'.

If the user selects "No," the flow will likely proceed to collect information relevant to a new student, such as registration details, personal information, and academic background. The process may also include steps to set up a new student profile within the system, offer guidance on available services, or initiate a process for new student onboarding. The selection could trigger different actions or data collection steps within the flow, ensuring that the process is tailored to the needs of a new student rather than someone who already has an established profile within the system.

Student Information Form:

The screenshot shows a Salesforce form titled 'EduConsultPro Flow'. The form contains the following fields: Student Name (Harsha vardhan), First Name (harsha vardhan), Last Name (MASHETTI), Phone (6,30,22,98,013), Email (harshavardhanmashetti@gmail.com), Date of Birth (11/01/2004), Address (godugupally), City (siddipet), Gender (male), Qualification (btech), and University Name (malla reddy university). Each field has a reset icon (a circular arrow) to its right.

This is a Salesforce form used in an "EduConsultPro Flow" process. It's designed to capture and manage student information, such as personal details, educational background, and contact information. The form is typically used by educational consultancies or institutions to organize student data for processing applications, admissions, or other related services.

Course Selection:

The screenshot shows the 'EduConsultPro Flow' interface. At the top, there is a search bar and a navigation menu with items like Sales, Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, Groups, Calendar, People, Cases, Forecasts, and Registrations. Below the navigation bar, the title 'EduConsultPro Flow' is displayed. The main content area features a 'Select Course' dropdown menu. The dropdown is open, showing options: '--None--', 'IELTS', 'GRE', 'GMAT', 'Duolingo', and 'TOEFL'.

This screenshot shows a dropdown menu in the "EduConsultPro Flow" where users can select a course from options like IELTS, GRE, GMAT, Duolingo, and TOEFL. This feature is used to specify the standardized test or course a student is interested in or applying for.

Registration Confirmation:

The screenshot shows the 'EduConsultPro Flow' interface at the registration confirmation stage. The navigation bar is identical to the previous screenshot. Below the navigation bar, the title 'EduConsultPro Flow' is displayed. The main content area shows a message to 'Dear Junaidh,' followed by a congratulatory message: 'Congratulations and welcome to EduConsultPro! We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.' Below this, it states: 'Your Registration details have been sent through mail kindly check it once.' and 'Thank you.' At the bottom right, there are two buttons: 'Previous' and 'Finish'.

This screenshot displays the final step in the "EduConsultPro Flow" process, where a registration confirmation message is shown. The message congratulates the user, Junaidh, on successfully completing the registration on the EduConsultPro platform. It informs him that he is now part of the community aimed at helping students achieve their educational and immigration goals. The message also mentions that the registration details have been sent via email and advises the user to check their inbox. The process concludes with options to navigate back or finish the flow.
